OBJECTIVE

Aspiring Software Engineer skilled in Java, Python, JavaScript and full-stack development. Focused on building scalable applications, writing clean code, and solving problems through data structures and algorithms.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks & Tools: React.js, Node.js, Express.js, Git

Concepts: OOP, DSA, REST APIs, WebRTC, Socket.io

Databases: MySQL, MongoDB

Operating Systems: Windows, Linux

EDUCATION

NMAM Institute of Technology, Nitte, Karnataka

2023 – 2026

B.Tech in Information Science & Engineering — CGPA: 8.35

Dr. T.M.A Pai Polytechnic, Manipal

2013 – 2016

Diploma in Electronics & Communication Engineering — 74.04%

PROJECTS

Full-Stack Video Conferencing Application | *MERN, WebRTC, Socket.io* | [Live Demo ↗](#)

- Developed a Zoom-like real-time video conferencing web app using React, Node.js, Express, and WebRTC.
- Implemented peer-to-peer video/audio streaming with WebRTC and real-time signalling using Socket.io.
- Built meeting features: room creation, join flow, mute/unmute, camera toggle, and UI layout adjustments.
- Developed backend signalling server to manage participant events and maintain room synchronization.

Full-Stack Online Stock Trading Application | *MERN*

- Built a stock-trading platform like Zerodha using React.js, Node.js, Express, and MongoDB.
- Implemented authentication, stock listing, and a dashboard for user portfolio overview.
- Designed reusable UI components and optimized REST APIs for smooth frontend-backend interaction.
- Ensured responsive UI and clean component structure following modern React best practices.

PROFESSIONAL EXPERIENCE

Frontend Web Development Intern

Algoorbit Innovations Private Limited, Karkala, Karnataka

- Developed a frontend web project (Maharaja The Royal Saloon) using HTML, CSS, JavaScript, and AWS.
- Gained hands-on experience with cloud deployment and professional frontend development workflows.

Industrial Technician

Dhofar Food Processing Company, Oman & Janatha Interfish, Mauritania

- Handled preventive and corrective maintenance of industrial machinery.
- Collaborated with cross-functional teams to improve operational efficiency.
- Strengthened analytical and troubleshooting skills applicable to software engineering.

CERTIFICATIONS & ACHIEVEMENTS

- Web Development (Full-Stack MERN) — Apna College
- Completed 30-Day LeetCode Challenge (120+ problems)
- Consistent academic performance with CGPA 8.35
